

BELLE PLAINE PUBLIC SCHOOLS PROJECT PROGRESS REPORT

September 2026 Update

WHAT'S NEW?

The construction phasing plan has been discussed in detail with the School District, architect, and construction manager. The plan covers construction traffic and staging areas, temporary playground locations, building exits, and coordination of the mechanical, electrical, and plumbing systems. The goal is to keep the schools operating safely and with as little disruption as possible during construction.

PLANNING & DESIGN UPDATE

A traffic safety analysis has been completed for both the Middle/High School and Elementary School sites. The recommended improvements have been reviewed with the City, School District, and design teams to address pedestrian safety around the buildings. The architectural and engineering teams are also completing their final quality assurance and quality control review of the construction documents, looking for any issues that need to be addressed before construction begins.

NEXT STEPS

- » Complete the design phase and finalize construction documents for bidding
- » Kraus-Anderson, the construction manager, will issue the construction documents and specifications to contractors for bidding
